SIMPLE.
EFFECTIVE.
AFFORDABLE.

Tutorsystems software helps seventh grade through adult students independently master basic skills in reading, grammar, and mathematics through this simple four-step process:

Tutorsystems software

1 **TESTS** students to determine skill deficiencies,

2 **PRESCRIBES** lessons to remediate the deficiencies,

3 **TEACHES** students the required skills, then

4 **TESTS AGAIN** to ensure skill mastery.

Need some
EXTRA TIME
for your students?

Leaves
NO STUDENT BEHIND

Leaving no student behind is a worthy goal. The reality is that many students have already fallen behind. Tutorsystems software helps these students by providing individualized assessment and instruction using a proven tutorial method. Tutorsystems software helps teachers by providing reports that show objective measurement of progress. Tutorsystems software gives you the tools you need to help students individually, many students at a time.

A True
TUTORIAL SYSTEM

Unlike programs that use a drill-and-practice approach, Tutorsystems lessons automatically adapt to each student's progress and comprehension through logical branching sequences. Immediate feedback is provided to the student for each answer. Correct answers move the student forward through the lesson while incorrect answers lead the student to supplemental information and an explanation of the error. A mastery test at the end of each lesson verifies performance before allowing the student to proceed to the next lesson.

Motivates
STUDENTS TO LEARN

As a student uses Tutorsystems software, an ever-expanding learning spiral evolves. The student *DEVELOPS SKILLS* through tutorials that are challenging but not frustrating. This achievement *PROMOTES CONFIDENCE*. This new confidence *IMPROVES ATTITUDE* and *PROVIDES MOTIVATION* to develop additional, more challenging skills. Skills are presented in a life-oriented context and move the student from lower order thinking skills to higher order thinking skills. Skill reinforcement is provided through the use of included student manual and reproducible student worksheet selections in PDF format.

Tutorsystems software enables students and teachers to **work from any location with Internet access.**

With its built-in diagnostic and prescriptive pretests and links to third-party assessment tools, the Tutorsystems software helps you to easily and efficiently **meet the diverse needs of your students.** The software's Automated Student Guidance feature helps keep your students focused on the right task at the right time.

Teachers love the interactive drill-down **reports that highlight actionable information** about student activity and performance.

With the Online Tutor option, you can even help your students when you're not with them. The Online Tutor opens up **new distance learning possibilities** for you and your students.

Interested? Try the software for yourself. **Request a demonstration today!**
